

BOM INFRA

Building Optimizing and Managing
Infrastructure

Company Overview

Bom Infra group is operating in multiple business sectors which include Railway, Power, Telecom, Automotive and Information Technology engaged in Civil Construction, Engineering, Consulting, Automotive, Process Outsourcing etc. The company is promoted by a team of professionals having abundant experience in Indian Railways and foreign trade. The company has its offices in India and South Australia.

Bom Infra is committed to its customers to build long-lasting associations based on its values of Excellence, Continual Improvement, Integrity, dependability, Sensibility & Customer Centricity to provide them with pioneering & high quality products and services. We have been gradually raising the horizon of our activities & progressing consistently. It has always been our endeavour to deliver high quality products and services.

Our Goal is to help our clients:

- **Get More with Less** – Utilize our services to increase their efficiency, reduce costs and maximize ROI.
- **Stay Assured** – Minimize project and production headaches and stay focused on their key business activities.
- **Be acquainted** – Know exactly what is being delivered and be aware of everything that is required.

All our business transactions are the result of our honest and reliable business conduct that helps us to gain confidence of our clients. Besides this our sound principles of corporate governance help us in obtaining and retaining the trust of our employees. We practice the best work environment and adopt the best possible measures to protect the essence of our environment.

Our Vision, Values and Purpose

Vision: To construct a better tomorrow. To be an ideal organization to work with where our people feel the sense of responsibility towards our clients, our society and our environment. To be the terminus for our clients for all their requirements of products, services and turnkey solutions. To set a benchmark for all our offerings.

Values and purpose: BOM Infra's endeavor has always been to be values driven from its' core to edge. Our basic values that describe the manner we operate are:

- **Excellence & Continual Improvement:** We are determined to bring excellence in all our activities and to continually improve and bring innovative solutions for the world which would ensure sustainable growth of the company and of those allied with us.
- **Integrity:** Bom Infra's foundation was laid on the principles of Integrity & Standards. We believe in transparency in all our business conducts and always maintain honesty in our associations.
- **Dependability:** We do our best to remain dependable in this long journey for our valued clients and customers.
- **Sensibility & Customer Centricity:** Our endeavor is to be compassionate and considerate for our clients and customers and always work to understand the necessities of the communities we serve and render valuable and practical solutions.

Owing these values we advance to serve our purpose of building trust and harmony among our employees, our clients and communities involved.

Code of Conduct

Code of conduct: BOM Infra and its employees shall,

- Abide by the law, rules and regulations of the country/ territory where they operate.
- Ensure the delivery of excellent quality products and services.
- Be moral and ethical in all their dealings and activities.
- Make all possible & affordable efforts to benefit the nation, localities and communities in which the company operates.
- Ensure the safety and cleanliness of environment.
- Respect the culture and traditions of the country or region where they operate.

Mission Green  : We construct, we grow but not at the cost of our environmental balance. We believe in maintaining the integrity, stability and beauty of our nature. We believe in sustainable development. We intend to construct a better tomorrow with this principle without sacrificing the performance and quality.

Business Areas

Civil Construction: BOM Infra specializes in steel/concrete bridge construction, building construction, pile/ well foundation, earthworks, drainage construction, road/highway construction. We also offer steel girders, channel sleepers and erection/ launching services. Our competences cover everything from designing, consultancy and planning to execution and maintenance.

Heavy Steel Fabrication: BOM Infra is an established source for advanced fabricated structures. We provide high quality ready to install fabricated steel structures for projects in railways, power, agriculture, defense and state or central government road projects.

Whether it is Steel Bridge Girder fabrication, Transmission Tower fabrication, Telecom Tower fabrication, Steel Channel Sleeper fabrication or any customized fabrication we are capable to deliver everything.

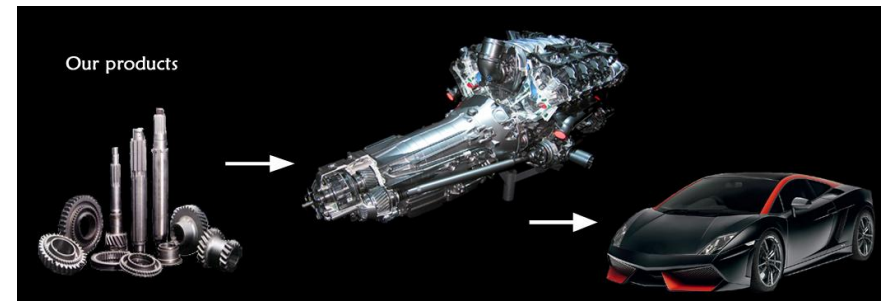

Business Areas ...continued

Rail/ Power Transmission: BOM Infra provides turnkey solution for Power Transmission/ Distribution and Railway Electrification. We possess a complete assortment of equipments and solutions for the efficient transmission of electricity. Our products include Transmission towers/ Masts, SPS (small parts of steel), Cantilever/ Bracket Assembly and Transformers, while we provide solutions right from Site Survey & Layout designing to Civil Foundation, Fabrication, Erection and Consulting etc.

Automotive: BOM Infra has stepped into this sector to cater to international demand. The company has automated forging and machining lines for manufacturing of automotive components like Gear blanks, Transmission and Differential Gears, Connecting Rods, Crankshafts, Valves, Compressor Parts, Crown wheels etc. We offer products for heavy, medium as well as light duty vehicles. We specialize in developing custom-made parts as per customer specifications.

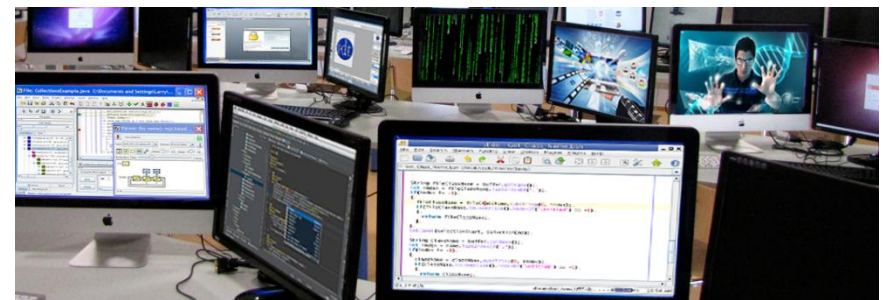

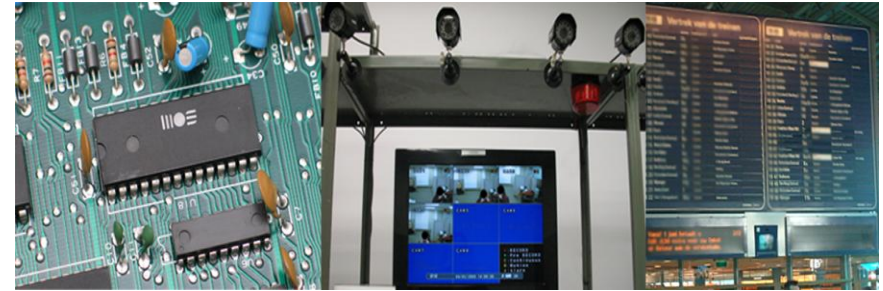

Business Areas ...continued

Signaling & Telecom: BOM Infra specializes in the design, manufacturing and installation of railway signaling and telecom products. Most of our products are built in-house however we also have strong associations that provide full support in numerous areas of technical expertise. We have a solid core of highly-skilled and trained staff who strives for excellence.

Our major S&T items include Integrated Passenger Information System, Public Address System, CCTV Surveillance System, Electronic (Solid State) Interlocking, Audio Frequency Track Circuits, Axle Counter, Data Logger system, SCADA, GPS clock etc.

Information Technology: BOM Infra has a specialized business unit to deliver consulting, infrastructure and software development solutions to its clients across the globe with focus on increasing productivity and resulting cost savings. Our team is specialist in providing solutions to small and medium sized businesses.

Services

Erection and Launching: BOM INFRA provides erection and launching services for Steel Bridge, RCC/PSC Bridge, Railway Electrification, Power Transmission, Telecom Towers, Shed Construction and Building Construction.

As main contractor we have the capability to provide turnkey solution for Bridge construction, Railway Electrification and Power Transmission; while as subcontractor, our scope of work includes construction stages analysis reports, shop drawings, engineering, material supply, installation, equipment mobilization, installation and project management consulting.

Below is the fleet list of cranes of BOM INFRA Group

Make	Model	Capacity	Main Boom	Fly Jib	Luffing
Liebherr	LT 1300	330 ton	64 mtr	34 mtr	56 mtr
Grove	AT 1500	150 ton	43 mtr	17 mtr

Hydra	12 ton	12 ton	40 ft		
Hydra	11 ton	11 ton	36 ft		
Hydra	11 ton	11 ton	36 ft.		

Services ...continued

Pile/ Well foundation: Designing and constructing a solid foundation is undoubtedly the most important aspect of any construction project. Without the right foundation, the whole structure built over it will not last for long and will eventually, cost even more to rectify. For these projects' timely execution with focus on quality it is very important to select the right service provider to be able to achieve total satisfaction. We are engaged in offering services to ensure the same. Piles are used to achieve the required compressive strength in the soft soil, to build a structure within the water or canal bed, to carry compressive nature of load through top bearing or end bearing etc. Pile foundations are mostly good option when the time schedules are rigid as they are rapid to construct.

OHE foundation & Erection: Overhead Electrification project of Railways in itself is a complex assignment consisting of various stages like Site survey, Soil testing, Layout plan designing, Foundation of masts/ portals, Erection of masts/ portals, Fabrication of Cantilever/ Bracket Assembly, Erection of Cantilever Assembly, Laying and Erecting Cables etc.

Fortunately, BOM Infra provides all these services as well as products as per Railway specifications. BOM Infra has skilled craftsman and technicians to carry out complete project with precision and in time. The combined knowledge and expertise of our entire workforce whether offshore or onsite, creates a strongly bound team committed to fulfilling complete projects' requirements. The company has developed techniques to take care of key concerns of the project that are quality, cost and schedule.

Services ...continued

Project Management (PMC): BOM INFRA provides its public and private clients our consultancy services to appoint experienced senior consultants for their projects. This offers tremendous advantage to the customer, as it eliminates the need for the customer to further manage the project. Therefore, hiring an outside agency to manage the resources for the project preserves the organization's time and human resources.

BOM INFRA has a dedicated unit to offer Project Management Consultancy to our esteemed clients.

Customized fabrication: BOM INFRA is an established source for advanced fabricated structures of any specification. We provide high quality ready to install fabricated steel structures for projects in railways, power, agriculture, defense and state or central government road projects.

Employing skilled craftsman and certified welders we ensure that the fabrication is done with precision and in time. Materials used in fabrication are of high grade whether it Structural steels, Carbon steels or Stainless steels. We utilize state-of-the-art equipments to handle all aspects of steel fabrication.

We have all Cutting facilities including High Definition Plasma cutting and CNC. Fabrication is performed by welders highly experienced in SAW (Submerged Arc Welding), GMAW (Gas Metal Arc Welding), SMAW (Shielded Metal Arc Welding), FCAW (Flux Cored Arc Welding), GTAW (Gas Tungsten Arc Welding) etc.

Services ...continued

High Rise Towers: BOM INFRA renders foundation, fabrication and erection services for the high rise towers. We prefer Prefabricated Construction Process that uses a factory-fabricated steel structure system and on-site installation, using flanges and high-strength bolts to join the construction members. It also incorporates integrated, installable floor slabs, light wallboard, and other prefabricated materials.

ITES: BOM INFRA is striving to exploit Information Technology for improving efficiency of our clients. We understand that outsourcing the processes contributes to the company's flexibility by enabling the company to focus on its core competencies, without being burdened by the demands of technical restraints. Key employees are thus released from performing non-core or administrative processes and can invest more time and energy in building the firm's core businesses.

Our dedicated unit provides services like software development, medical transcription, medical billing and coding, revenue claims processing, content development, payrolls, logistics management, HR services and other consulting services.

Our perfect combination of technologies and communication channel to address both voice and non-voice based processes result in high degree of improvement in the quality of our service we render to our clients across the globe.
